VETERINARY REPORT FOR 'SWEETEST MOMENT'

Signalment: Two Year Old Thoroughbred Filly

Microchip: 985100012117979

Trainer: Mrs Gai Waterhouse and Mr Adrian Bott

On the 30th April, 2019 'Sweetest Moment' was found to be slightly lame in her off hind leg, with effusion (increased synovial fluid) in her fetlock joint. Flexion of this fetlock exacerbated the lameness.

Today, radiographs of this fetlock revealed an osteophyte ('bone spur') on the proximal dorsomedial aspect of her proximal first phalanx. She also has some 'spurring' of her proximal sesamoid bones. These changes indicate early arthritic changes in this joint that are possibly associated with the previous injury to this leg. The filly is already receiving weekly intramuscular injections of Cartrophen, which she should continue to receive. If the lameness does not resolve, the filly may require a short spell to let the inflammation in this joint resolve.
