Midas Road
Miners Rest, Victoria 3352**

Dear Matt,

Re: Anthemoessa

Anthemoessa was examined by the Ballarat Veterinary Practice Equine Clinic, at your stables, on **1 September, 2020**. **Anthemoessa** was found to display a mild lameness of the right fore limb (grade 1/5). Flexion tests of the limb exacerbated the degree of lameness displayed. Diagnostic analgesia (nerve/ joint blocks) were used to identify the source of lameness as arising from the right fore proximal metacarpal region.

Further diagnostic imaging is recommended to investigate the injury to the right fore limb.

Diagnosis:

Anthemoessa has lameness arising from the right fore proximal metacarpal region.

If you have any questions please contact the clinic on [5334 6756](tel:53346756).

Yours sincerely,

**Dr Tom Dolan BArgSc, BVMS, MRCVS
