<b>Age / Date of Birth:</b>	4 Years old / 13-10-2016
<b>Microchip:</b>	985100012110036
<b>Brands:</b>	

This is to certify that I examined the horse Get On Board at Armidale racetrack on the 18th of November 2020. The heart and lungs were auscultated. The heart rate was regular and there were no abnormal heart sounds. The respiratory rate was normal and no abnormal lung sounds were heard. The eyes were examined. All reflexes were normal, vision appeared intact. Both eyes were symmetrical and clear. All four limbs were palpated and hoof testers applied to each foot. There is an old splint bone injury on the medial split of the left front. This is hard and show no signs of ongoing inflammation. There was no pain on flexion of any joint and no other significant findings. There was no response to hoof testers in any foot. The horse was examined at the walk and trot. There was no evidence of ataxia or any obvious lameness.

In my opinion there is no evidence of any condition that is likely to have a negative impact on future racing soundness in this horse.

Yours faithfully,
