

REPORT ON EXAMINATION

Date: 5th April 2022

Horse: Kutayha (NZ)

Brown Thoroughbred gelding

Microchip: 985125000094677

Branded: A on left shoulder' 8 over 6 right shoulder

Born: 15/10/2016

Owner: Waller Racing

PO Box 3069

North Parramatta NSW 1750

Place of Examination:

Grand Park View Stud

Albert Rd

Draper 4520

This certifies that I examined the above horse prior to sale. The horse last raced 26/3/2022.

A full clinical examination was performed. The horse was examined at the led walk and trot on a firm flat surface. Flexion testing was performed on four legs. The results of the examination are below.

Clinical Examination:

The horse was presented in fit condition. The horse was tractable and easy to handle. All clinical parameters were within normal limits. There is no evidence of abdominal surgery.

**Foot Examinations:**

The horse was barefoot. The horse was negative to hoof testers in all four feet. The front leg conformation is base narrow, toe out with the right foreleg more turned out compared with left fore leg. The hind leg conformation is mildly toe out.

The horse is not lame on straight trot on firm, gravel surface. All flexion tests were within normal limits.

Cranial Nerve and Gait Examination:

Muscle mass is within normal limits.

There is no ataxia, paresis or proprioceptive deficits on static exam and while backing and turning.

Dental Exam:

The dental arcades have recently had any pathology corrected and there is no significant pathology.
